

9/7/93 Mtg w/ MDD

* MPEG compress output from Onyx and
send to PC/CDI w/ MPEG decompress
hardware

* Video CD - type, but for visualization

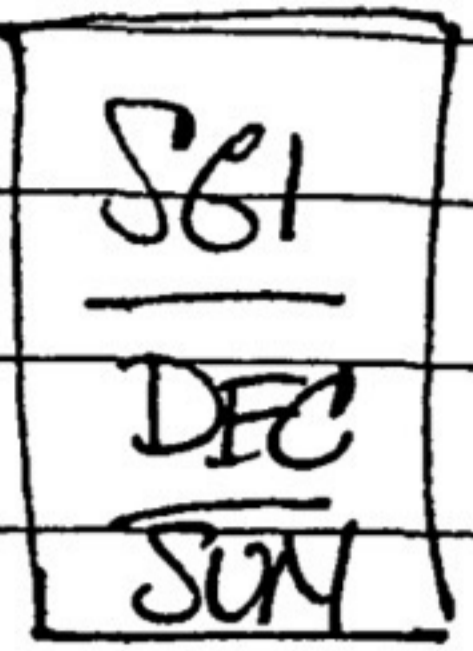

Problem

* How to deliver ~~at~~ results, either due to
computation or graphics to low cost sent?

Visualization: send commands to remote server
that performs ~~a~~ visualization and sends back
compressed image as result (e.g. JPEG)
→ send back delta only, ala MPEG

low-cost PC/Windows?

MPEG stat server

network

cmds

local CPU w/ decompression

Xterminal?
